Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Status

- ☒ Responsive to communication(s) filed on 9/4/01

Office Action Summary

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1-8, 12, 16-22, and 26-27 are rejected under 35 U.S.C. § 103 as being unpatentable over USP 5122339 to Pickens et al (PTO-1449, claim 1), USP 5211910 to Pickens et al (PTO-1449, abstract), USP 5259897 to Pickens et al (PTO-1449, abstract), JP 01025954 (abstract), WO 9532074 (abstract), WO 9212269 (abstract), or DE 2810932 (abstract). References are applied individually under 35 U.S.C. § 103.
4. The cited references disclose the features substantially as claimed. The disclosed features include the claimed Al base alloy. The difference between the

reference(s) and the claims are as follows: the cited references do not teach to avoid formation of an Al_3Li phase or function of the Li ions to form clusters of atoms of solute. However, the instant alloy composition is overlapped by the cited references; consequently, the properties as recited in the instant claims would have inherently possessed by the teachings of the cited references. Therefore, the burden is on the applicant to prove that the product of the prior art does not necessarily or inherently possess characteristics attributed to the claimed product. In re Spade, 911 F.2d 705, 708, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990) and In re Best, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977). Overlapping ranges have been held to be a prima facie case of obviousness, See MPEP § 2112.01, In re Best, 195 USPQ 430, In re Malagari, 182 USPQ 549, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Wertheim, 541 F.2d 257, 191 USPQ 90 (CCPA 1976).

Response to Arguments

5. Applicant's arguments filed September 4, 2001 have been fully considered but they are not persuasive.
6. Applicants argue that the claimed composition possesses unexpected results. However, the unexpected results have not been shown in the instant specification. In

re Burckel, 201 USPQ 67 and MPEP § 716.

7. Applicants argue that the claimed Li content avoids formation of an Al_3Li phase. But, cited references do not disclose an Al_3Li phase formation. Furthermore, there is no evidence on record that the claimed Li content is critical to avoid formation of an Al_3Li phase.

8. Applicants argue that the examples of cited references have much higher Li content than claimed. But, the examples of the cited reference are given by way of illustration and not by way of limitation. In re Boe, 148 USPQ 507 (CCPA 1966) and In re Snow, 176 USPQ 328.

9. The court cases cited by applicants are noted. But, they have been misplaced because the instant claimed alloy compositions are overlapped by the alloys of cited references. Moreover, applicants have not substantiated by evidence that the claimed Li content is critical to avoid Al_3Li phase.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the mailing date of this final action.

Applicant is reminded that when amendment and/or revision is required, applicant should therefore specifically point out the support for any amendments made to the disclosure. See MPEP § 2163.06 (a) and 37 C.F.R. § 1.119.
